

## You can cut your costs and get help to gain environmental credentials in accordance with ISO 14001 and BS 8555 with an Environmental Management System

And now you can sign up, at half the normal price, to get the support you need to implement an EMS in your business

Take part in the project that has already helped over 60 businesses to:

- Gain accreditation to **ISO14001** or **BS8555**
- Make cost savings **over £628,500 per year**
- Get access to tenders and new income **worth over £8,886,300**
- Reduce carbon emissions by **23,200 tonnes of CO<sub>2</sub>e per year**
- Show their **environmental commitment** to customers
- Train **over 90 people** in environmental management

If your business has fewer than 250 employees, and is located in Yorkshire and Humber, you can get:

- **Four full day workshops** that provide you with the knowledge, tools and techniques to implement an effective environmental management system, essential for gaining ISO14001 or BS8555
- **Three days of support** on your site from an experienced EMS advisor to help implement the system in your business
- Support **spread over 6 months** to create an EMS that fits with your business
- **Level 2 membership of Construction Target** offering access to tender opportunities, free invites to meet the buyer and procurement workshops, and a 250 word entry in the Construction Target Directory

**Sign up today, and**, thanks to funding from CO2Sense and the European Union, your business can now benefit from the EMS Project and membership of Construction Target at less than half the normal cost - (maximum) £1200 plus VAT.
